

Status of human resource capacity for agricultural innovation in ASARECA national agricultural research systems

The study targeted 6 countries in the ASARECA region: Burundi, Democratic Republic of Congo, Eritrea, Madagascar, Rwanda and south Sudan. Within those countries the target organisations were national agricultural research institutes, agricultural universities (public and private) and private research companies/ institutes where they exist. The study assesses the human and institutional capacity on the ground, looks at the overall environment, including infrastructure that supports research, and makes several conclusions and recommendations.
