

- 1. The area in the height has been reduced.
- 2. Bottom line reduced.
- 3. The out of focus area are supposed to be clickable that's how the slider functions.
- 4. The Arrows are aligned as shown. We must be having different resolutions.
- For highlights in menu it's hard to highlight them because the items are not linked to the main menu items, these are just panels of different content gathered and attached to a menu item.
 Still looking for modules which can help to associate nodes with a menu without attaching them directly.
- 6. The videos which were below in support pages were removed we now have links.
